IMAGERY INFORMATION REPORT

PROBABLE NEW SOVIET FIGHTER, RAM-K (TSR)

(TSR) A probable new Soviet fighter, interim designator RAM-K, was observed at Ramenskoye Flight Test Center, USSR, [REDACTED]. The canvas-covered aircraft was being towed on the taxiway adjacent to the Mikoyan parking area. (NIIRS 4)

25X1

25X1

(TSR) The RAM-K aircraft has a pointed nose and twin vertical stabilizers. A bubble-type canopy appeared to be mounted midway between the nose and the wing root, similar to the bubble canopy mounted on the US F-15 aircraft. The wing area appeared to be swept or possibly variable geometry. The engine placement was not discernible.

(TSR) Preliminary mensuration indicates that the overall length of the RAM-K is approximately 20 meters and the wing span is approximately 13 meters. The wing sweep angle is approximately 45 degrees. A more detailed mensural analysis will be presented in a following report.
